

Next Coldroombazaar Meeting

- The navbar is not needed when the user is on the profile section.
- Currently, the ads section only has a date field but no time field. To track ad renewals accurately, both date and time should be recorded when an employee renews their ad.
- In the dealer and service module, three panels are available: Category, State, and City. If a user attempts to select a City before choosing a Category, a validation message should appear in the text field: 'Please select a category first'.
- In the Add New Product and Service section, users should be able to choose multiple states and cities so they can post their ads in nearby states at the same time.
- There should be a separate login option for the admin. If I want to add or remove an admin, I should be able to manage it from the admin panel.
- In the registered user section, does any content violate the privacy policy?
- **When a user searches for 'Modular Cold Room Seller' show all available factories/companies along with their state name. [The state name should also appear on the card.]**
- **In the Dealer & Service Provider Locator, the icon is currently pointing to the right. It should be changed to an upward arrow.**
- The 'Number of Employees' field should be removed from Add New Product/Service. It should only be filled in during company registration.
- **When a user selects a category (e.g., PUF Panels, Cooling Units), all the listings under that category should be displayed. There is no need to verify the city, no matter which city they belong to.**
- The content on the home page is missing and needs to be fixed.

- Add in the Edit Blog section, content inside a container <div> to maintain proper layout and alignment.
- Add some more pages in the menu dropdown. like
 - home
 - gam
 - jam
 - Sam
- **The owner account should have access to view all inquiry messages. At present, inquiry messages are not showing in the owner's inquiry section—this needs to be fixed.**
- **When I log in, there is no need to show the 'List Your Business' option.(as a visitor it's fine)**
- [https://developer-beta.com/p7/siddiq_ali/products/all] some times when I click register user some times the url work on tis path

For Mobile Version

- The state/city select icon is not aligned correctly.
- In the 'Search by Brands' section, the brand icons are square but should be round.
- In the mobile version, the category section should display as a horizontal card carousel so users can swipe through categories easily.
